WORK EXPERIENCE

Founding Software Engineering Intern — TheGradleW Technologies, Remote

July 2026 – Present

- Contributing to **AI-driven infrastructure** solutions focused on **network reliability**, distributed monitoring, and observability.
- Designing **cloud-native and Edge AI architectures** and developing proof-of-concepts for scalable infrastructure systems.
- Researching **LLM-based** incident analysis and root cause detection to automate infrastructure troubleshooting workflows.
- Collaborating on system architecture, distributed telemetry pipelines, and technical proof-of-concept development.

Frontend Development Intern — DiGrows, Roorkee, Uttarakhand, India, Remote

May 2025 – July 2025

- Built scalable React.js frontend serving **500+ active users**, improving UI responsiveness with React Query caching and lazy loading.
- Built **20+** reusable UI components, replacing repeated JSX across multiple modules and accelerating feature development.
- Integrated **15+ REST APIs** using TanStack Query, reducing redundant network requests by **35%** to improve performance.

Tech Stack: React.js, Vite.js, React Query, REST APIs, GitHub, HTML5, CSS3

PROJECTS

AI Video Assistant – Meeting Intelligence & Contextual RAG Platform ([Live](#) | [GitHub](#))

Sept 2026

Python, Streamlit, LangChain, Mistral AI, OpenAI Whisper, Sarvam AI, ChromaDB, HuggingFace

- Built a **meeting intelligence pipeline** for media transcription, hierarchical summaries, and action-item tracking.
- Developed context-grounded **RAG Q&A** using **ChromaDB** and **HuggingFace embeddings** for meeting-specific retrieval.

Forge AI – Agentic Application Development Platform ([Live](#) | [GitHub](#))

May 2026

Next.js, Gemini AI, BullMQ, SandPack, Redis, Prisma, PostgreSQL

- Built an **agentic AI platform** that generates React applications from text-based prompts with live preview and code streaming.
- Developed asynchronous backend workflows using **BullMQ + Redis**, with **REST APIs**, multi-file editing and secure **API rate limiting**.

AllySupport – Customer Support SaaS Platform ([Live](#) | [GitHub](#))

Jan 2026

Next.js, TypeScript, MongoDB, Scalekit

- Architected a multi-tenant AI chatbot platform delivering **24/7** support, embeddable on any website with a **single script**.
- Implemented **secure authentication**, **dynamic knowledge base**, and Redis-based API rate limiting for efficient request handling.

Horizon – AI-Driven Interview Preparation Platform ([Live](#) | [GitHub](#))

Aug 2025

MERN, Firebase, Stripe, Redux Toolkit

- Designed AI-powered interview platform using **Gemini API**, simulating real-time interviews with resume-based personalization.
- Built performance analytics dashboards to track mock interview scores, user progress, and skill-wise performance.

TECHNICAL SKILLS

Languages: Java, JavaScript, TypeScript, Python, HTML, CSS, C

Frameworks & Libraries: React.js, Next.js, Node.js, Redux Toolkit, Express.js, FastAPI, Tailwind CSS, Socket.IO, gRPC, GraphQL, Prisma, JWT

AI/LLM: LangChain, LangGraph, ChromaDB, RAG

Databases: MongoDB, PostgreSQL, MySQL, Redis

Tools & Cloud: Linux, AWS (EC2, S3), Docker, Kubernetes, Git, GitHub, GitLab CI/CD, Postman, n8n

CS Fundamentals: Data Structures and Algorithms, Object-Oriented Programming, OS, DBMS, CN, System Design, Microservices

EDUCATION

Quantum University, Roorkee, Uttarakhand, India

B.Tech in Computer Science & Engineering (AIML) | CGPA: **8.31/10** | Aug 2023 – June 2027

ACHIEVEMENTS & CERTIFICATIONS

- [freeCodeCamp — Back End Development and APIs Certification](#) — Sep 2026
- [AWS Cloud Quest – Cloud Practitioner](#) — Feb 2026
- Winner** – Annual Tech Fest Hackathon, Quantum University (2024)([Certificate](#)), **Top 30** at Galgotias International Hackathon ([Link](#)).
- Team Lead** – Finalist in **5+ national and university hackathons**.
- Solved **500+** Data Structures & Algorithms problems across platforms (**400+ on LeetCode**), with a strong focus on problem-solving, analytical thinking, and collaboration skills.
- Delivered **15+** freelance web applications for **10+ clients** across **EdTech**, **enterprise**, and other domains, handling everything from requirements to deployment.
